SILVERCRAFT
"HIGHER STANDARDS"

Located in the heart of Amish Country in Northern Indiana, Silvercraft began with a vision of providing contractors with solution driven products to save valuable time on the jobsite.

Having built many barns as a contractor, experience taught Gary that building doors on site, in less than ideal conditions, was inefficient and time consuming. This frustration led to the idea of pre-hung doors that could be slid into the opening, set, and finished with little assembly. Today we offer Dutch Doors, Sliding Doors, Bale and Loft Doors that meet those objectives.

Our heritage has taught us that service, integrity, hard work and attention to detail are essential ingredients in life as well as in business. Thank You for considering Silvercraft Doors for your next project.

SLIDING DOOR ACCESSORIES

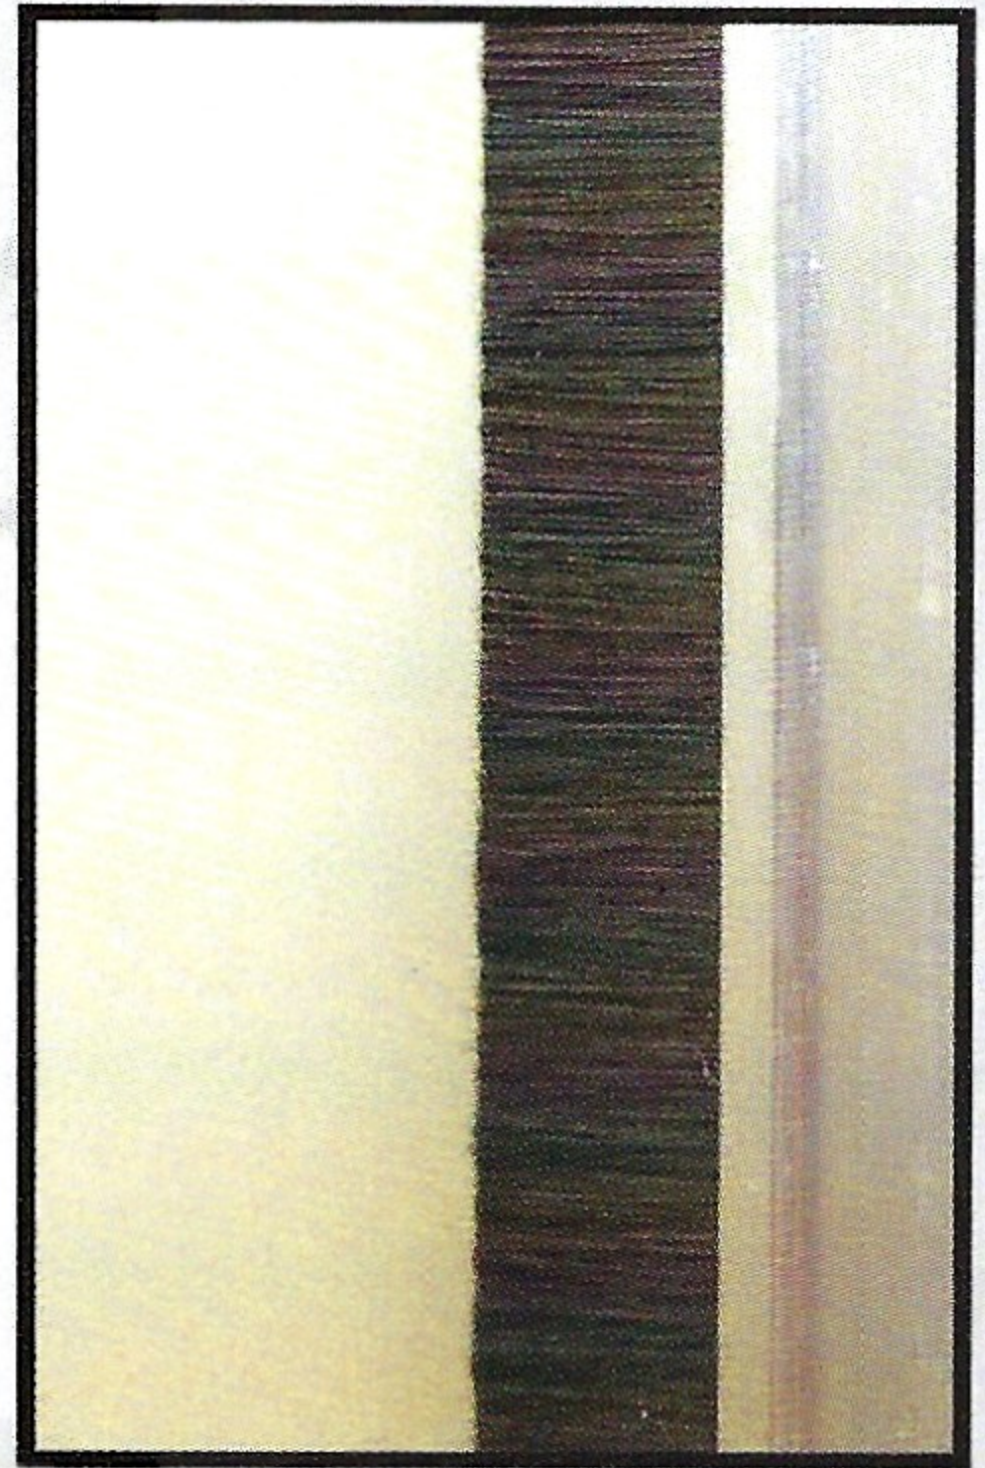

CENTERLATCH

An internal latch that joins the Split Sliding Doors together.

BRUSH SEAL

Limits air infiltration around the perimeter of the door opening without affecting the sliding action of the door.

JAMB BRACKET GUIDE

Hidden jamb bracket prevents door from pushing out and helps door alignment when opening and closing.

BOTTOM GUIDE RAIL

Provides door stability for large sliding doors in windy conditions as well as assisting with door alignment when opening and closing.
